LAKOKRASKA

ALL
SHADES
OF BRIGHT

JSC "Lakokraska" firmly holds the status of the leading enterprise of the Republic of Belarus in the field of production of paints and varnishes for industry, retail trade and export abroad.

At present time, the plant, developing its scientific base and working in close contact with the consumer, develops and produces modern high-quality paints and varnishes that compete with imported ones, and promotes these materials not only to the technological lines of Belarusian enterprises, but also abroad.

JSC «LAKOKRASKA» PRODUCES
MORE THAN 2000 OF PRODUCTS,
INCLUDING COLORS.

Consumer products are manufactured under the following trademarks:

- TM «LIDA» (traditional paints);
- TM «FRESKO» (facade and interior water-dispersion primers and paints);
- TM «MASSIVE» (materials for protective and decorative wood processing);
- TM «GARAGE» (automobile technical fluids).

The quality of the manufactured goods shall be confirmed by the certificates:

- environmental management system for compliance with the requirements of the national standard STB ISO 14001 and the international standard ISO 14001;
- labor protection management system of the enterprise in accordance with the requirements of STB 18001-2015;
- a certificate attesting that the quality management system complies with the requirements STB ISO 45001-2020

LIDA
ЛАКОКРАСКА

GLUE AND DISPERSION

It is used in the printing, leather, leather goods industry for gluing wood, cardboard and paper.

For protective and decorative coloring of trunks and bases of skeletal branches of fruit, ornamental trees and shrubs in order to increase the winter hardiness of tree bark tissues; protection from sunburn, protection from rodents and hares; preventing the development of mosses and lichens; increasing resistance to diseases. The paint contains antiseptic, antifungal and antimicrobial additives that help to protect plants from the penetration of insect pests and spores of pathogenic fungi.

PAINT

SEMI-SINISHED VARNISH AU-059

- ▶ It is intended for the production of quick-drying, weather-resistant, wear-resistant, resistant to water and weak solutions of chemical substances enamels, primer-enamels, primers and varnishes which are able to form decorative and protective coatings on various types of surfaces.

VARNISH PF-020

- ▶ It is intended for the manufacturing of pentaphthalic enamels, primers, fillers and for the production of other paints and varnishes.

SEMI-SINISHED VARNISH ALKYD PF-060

- ▶ It is intended for the manufacturing of pentaphthalic enamels, primers, fillers and for the production of other paints and varnishes.

SEMI-SINISHED VARNISH ALKYD PF-060 «V»

- ▶ It is intended for use as a binder in the manufacture of pentaphthalic enamels, primers, fillers and in the production of other paints and varnishes.

SEMI-SINISHED VARNISH «LIDAALKYD 60»

- ▶ It is intended for the manufacturing of enamels, primers, fillers and for the production of other paints and varnishes.

SEMI-FINISHED PRODUCTS

ALKYD VARNISH «BELLAK 60»

- ▶ is intended for use as a binder in the manufacture of enamels, primers and other paints and varnishes. Varnish-based paints and varnishes can be used both in atmospheric conditions and indoors, forming coatings with good decorative and protective properties

ALKYD VARNISH «BELLAK 60 V»

- ▶ is intended for use as a binder in the manufacture of enamels, primers and other paints and varnishes. Paints and varnishes on the base of this varnish can be used both in atmospheric conditions and indoors, forming coatings with good decorative and protective properties

SEMI-SINISHED VARNISH PF-053 «LIDA»

- ▶ It is intended for use as a binder in the manufacture of pentaphthalic enamels, primers, fillers and in the production of other paints and varnishes.

ALKYD VARNISH «BELLAK T 55/X»

- ▶ It is used as a binder for the production of the enamel «BELOLUX».

SEMI-SINISHED VARNISH LIDAALKYD 60 «L»

- ▶ It is intended for the manufacturing of coatings with the high degree of whiteness, as well as it may be used as a binder in the manufacture of primers and fillers.

PHTHALIC ANHYDRIDE TECHNICAL

- ▶ It is intended for the production of plasticizers, alkyd resins, dyes, medicines and in the rubber industry.
